

Cisco Business Edition 4000

Benefits

- **Reduce the cost of communications.** Lower call charges and consolidate networking overheads with an affordable IP phone system, optimized for small and midsize businesses
- **Respond quickly.** Preconfigure and deploy a Business Edition 4000 system in less than one day
- **Simplify administration** with intuitive cloud-hosted management for IT admins and end-user preferences
- **Strengthen relationships** with reliable VoIP telephony, offering superior clarity that supports a host of calling features
- **Be more flexible** with support for the latest Cisco IP phones for a range of use cases and budgets
- **Invest with confidence.** Plan for technology migrations ahead of time, with flexible, term-based licensing plans and hardware investment protection as you migrate to cloud or hybrid collaboration with Cisco Spark™

Reduce the Cost and Complexity of Office Communications

The personal relationships between your employees, customers, suppliers, and other business partners are critical to your success. And we all know how important the quality of good communication is.

Expensive to maintain and operate, with unreliable quality and based on outdated analog technology, your current phone system could be holding you back.

As your business grows, you need a phone system that can grow with you, one that is simple to set up and easy to manage.

Cisco® Business Edition 4000 is a modern, cloud-managed voice over IP (VoIP) phone system, based on proven technology, that helps small organizations save on communications costs.

Simple, Cloud-Managed Office Communications for Small Business

Cisco Business Edition 4000 is a dedicated voice appliance for small businesses, providing IP telephony and voicemail services for up to 200 devices. Unlike competing solutions, it is completely cloud-managed, featuring simple and intuitive management capabilities that make it easy to deploy, manage, and use.

- **High-quality telephony and voicemail:** Supports the latest Cisco IP Phone 7800 and 8800 Series phones, delivering wideband audio with superior clarity.
- **Comprehensive calling features:** Call park, hold, and transfer, plus hunt groups, conference, auto attendant, and much more.
- **Quick to deploy:** Cisco partners can preconfigure settings and deploy a new system in less than a day.
- **Easy to manage:** A simple dashboard for administrators keeps key status information close to hand and makes everyday additions of users and phones a breeze.
- **Easy to own:** One-, three-, or five-year term-based license plans make it easy to plan for future investments and provide access to telephony features, the management portal, and award-winning 24x7 Cisco support.
